Cook Smart with Maverick Digital Thermometers

Our full line of innovative digital thermometers offer state-of-the-art features. The line includes patented items including the digital candy / deep fry thermometer and the anticipation thermometer that uses an internal chip that can tell the cook when the food will be ready hours in advance. The digital line includes both entry price point items and full featured products that can round out any assortment.

Cook Smart with Maverick App-Driven & Remote Thermometers

Maverick is the inventor of the remote digital thermometer. We offer remote thermometers from opening price points to highly sophisticated units that have two probes; one to monitor food and another to monitor the BBQ. Both have alerts when the BBQ is out of the preset temperature range. Ask us about our brand new line of App-driven digital smart cooking thermometers including the Direct Connect ET-11 and the Bluetooth powered ET-735 shown here.

**ET-735
BLUE TOOTH
BBQ THERMOMETER**

Cook Smart with Maverick Grill Forks & Probes

From the time that we introduced the BarBChek in 1989, Maverick has been on the cutting edge of innovation and design in barbecue forks and barbecue probes. Our line covers all price points and features basic to professional units with thermocouple technology and some with our exclusive Rapid Read Tip. Whatever your assortment, Maverick has the right fork for your barbecue department.
