

**INSTRUCTION MANUAL K65062**  
**Digital "Shake" Thermometer**

**OVERVIEW**

1. LCD
2. Hold Button
3. °C/°F Button
4. Meat Probe

**LCD Display Instructions**

1. Temperature display
2. Temperature scale
3. HOLD icon

**Operating Instructions**

1. With the meat probe in the closed position SHAKE the thermometer

vigorously from end to end for at least 2 seconds. Then rotate the probe to full open position.

2. Within 1 second the thermometer will go into normal temperature measurement mode.
3. You should have energized the unit for about 40 seconds to check the temperature of your food.
4. Press the °F/°C button to switch the temperature scale from Fahrenheit to Celsius and back.
5. Press the HOLD button to lock the temperature display. Press HOLD again to unlock the display.

**Temperature Range**

1. Temperature range: -58°F to 392°F (-50°C to +200 °C)
2. "HHH" will display when the temperature is higher than the maximum temperature
3. "LLL" will display when the temperature is lower than the lowest temperature

**Warning**

1. Meat Probe acceptable temperature range: -58°F to 392°F (-50°C to +200 °C)
2. The Meat Probe should always be inserted into the center of the meat for an accurate temperature.
3. The stainless-steel probe tip will get hot.
4. Do not use probe in a microwave oven or expose to flames or temperatures exceeding 392°F (200°C).
5. Not intended for children under 12 years old.

back size:240x180mm

**Care**

1. Clean the probe after each use.
2. Wash the stainless-steel meat probe tip with hot soapy water and dry thoroughly. Wipe the thermometer base with a damp cloth.
3. Do not immerse the probe in water while cleaning.
4. To avoid damage, do not use cleaning agents or abrasive cleaners.
